PROFILE

Experienced full-stack web developer using a background in psychology to improve client-side user experience. Passionate about building functional and modern websites for various clients. Proficient in the MERN stack and WordPress; however, prioritizes learning and adapting to new tech frameworks as they evolve. Enjoys bringing clients' goals to fruition by confidently and independently building websites and problem-solving with teammates.

EDUCATION

Bachelor of Science in Psychology, University of Minnesota - Twin Cities,
Graduated: Summer 2020   *Cum Laude - GPA 3.65*

University of Minnesota - Full-Stack Web Development Bootcamp
Graduated: Winter 2020

INTERNSHIPS

Front-End Web Developer at Blue42 Agency
Spring 2021 – Summer 2021   Maple Grove, Minnesota

-Successfully built seven websites for various marketing clients during a 90-day internship, including the following examples: Matt Johnson Outdoors, Amplified Electric, and Ultimate Panfish League.

-Collaborated with other developers to solve technical problems

-Carefully updated various content of existing websites

-Learned and adapted to new technology, including the following: PHP, WordPress, Plesk, & Adobe Illustrator/Photoshop

EMPLOYMENT HISTORY

Install Crew Member at Biota Landscapes
Summer 2018 – 2020   Minneapolis, Minnesota

-Assisted foremen in creating residential landscapes by following orders, designs, and deadlines

-Safely and precisely used various forms of heavy machinery to skillfully lay raw materials

-Communicated articulately with co-workers via phone and in-person to clarify project specifications

PROJECTS

Matt Johnson Outdoors | Live Link: https://mattjohnsonoutdoors.com/
Summary: Professional angler site for Matt Johnson, which markets his sponsors, recipes, and various fishing tours.

Role: Built during my Blue42 internship and closely follows a wireframe provided by the design team.

Technology: HTML, CSS, JavaScript, jQuery, WordPress, UI Kit, Adobe Illustrator

Modist Music | Live Link: https://cryptic-fortress-75760.herokuapp.com/
GitHub: https://github.com/Josly025/e-ssentials.io

Summary: Music application inspired by Spotify that allows you to find new songs by searching an artist. The application also features login authentication.

Role: I built this project myself based on my passion for music and coding.

Technology: HTML, Sass, UIkit, JavaScript, Node.js, MongoDB, API
